Council Agenda Memo

From: Keith Kurz PE, Assistant Public Works Director

Meeting: November 14, 2017

Subject: Approving Bid Award for Sanitary Sewer Collection System Rehabilitation – Various Locations; Project No. 2017-S-2B

Presenter(s): John Collins PE, Public Works Director

Background

On September 8, 2017 the Engineering Division of the Public Works Department advertised for bids for Sanitary Sewer Collection System Rehabilitation – Various Locations; Project No. 2017-S-2B.

Sanitary Sewer Collection System Rehabilitation-Variou Locations; Project No. 2017-S-2A, the initial phase of this work was awarded, to The Diamond Engineering Company of Grand Island, Nebraska in the amount of \$304,380.16 on May 23, 2017, via Resolution No. 2017-151.

This second phase of the project, 2017S-2B, is for rehabilitation work for fixing cracks and leaks in the existing pipe with a cast in place liner that will be run inside the existing pipe. Open excavation for this project is not planned and crews will gain access to complete this work through existing manholes. This is a specialized process which is becoming very popular across the country with the continued aging of infrastructure.

There are approximately 230 miles of gravity sewer within the City of Grand Island's collection system. The majority of this infrastructure is between 26 and 75 years old, and between 8 and 18 inches in diameter. The majority of the sanitary sewer rehabilitations are related to old clay tile pipe and or damaged / dilapidated manholes.
