**Regular Session**

## **Item J1**

### **Discussion on the Next Potential Amendment to the Long Range Transportation Plan**

Staff Contact: Allan Zafft, MPO Program Manager

**TAC Agenda Report**  
December 12, 2022

**Agenda Item No. J1**

**ISSUE**

DISCUSSION: Next Potential Amendment to the Long Range Transportation Plan

**BACKGROUND**

In January 2023, the Nebraska Department of Transportation (NDOT) may submit major changes to NDOT project(s) for the GIAMPO FY 2023-2027 Transportation Improvement Program, which would require TIP amendment approvals at the GIAMPO Technical Advisory Committee (TAC) and Policy Board meetings in February 2023. These major changes would also require an amendment to the 2045 Long Range Transportation Plan (LRTP).

The GIAMPO Public Participation Plan requires a 30-day public comment period for a proposed amendment to the LRTP prior to approval by the Policy Board. As specified in the Public Participation Plan, one of the minimum required techniques & strategies for updates and amendments to the LRTP is a discussion with the TAC prior to the public comment period. The time period between the February 2023 TAC and Policy Board meetings is less than 30 days. Therefore, the December 12, 2022 TAC meeting will include a discussion of the next potential LRTP amendment, satisfying the requirement for a discussion with the TAC prior to the public comment period.

GIAMPO staff will discuss the next potential amendment to the 2045 Long Range Transportation at the December 12 TAC meeting.
