**Introduction**

As required by 23 CFR 420 and 450.314 the Grand Island Area Metropolitan Planning Organization (GIAMPO) has prepared this Unified Planning Work Program (UPWP).

The purpose of this document is to provide the citizens of the GIAMPO and all partnering governing bodies an outline of the Metropolitan Planning Organization’s planned work activities, and identify the funding for those activities for fiscal year 2015,(July 1, 2014-June 30, 2015). This document is a budget document and it may be amended by the policy board as priorities and activities change.

The primary objectives for this year are to implement the Continuing, Cooperative, and Comprehensive, (3-C) transportation process to develop a performance based Long Range Transportation Plan, Formal Public Participation Plan, goals, objectives, and performance measures in accordance to current Federal Transportation Act MAP-21, and to institute a transportation planning process that will address the needs and investments in the transportation system in order to adequately maintain the transportation system.

**These Factors Include:**

The metropolitan planning process must explicitly consider and analyze, as appropriate, eight planning factors defined in MAP-21 that reflect sound planning principles and in coordination, cooperation, and continuing with stakeholders in the Grand Island Metropolitan Planning Organizations Planning Area.

- ✓ Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity and efficiency;
- ✓ Increase the safety of the transportation system for motorized and non-motorized users;
- ✓ Increase the security of the transportation system for motorized and non-motorized users;

- ✓ Increase the accessibility and mobility options available to people and for freight;
- ✓ Protect and enhance the environment, promote energy conservation, and improve quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;
- ✓ Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
- ✓ Promote efficient system management and operation; and
- ✓ Emphasize the preservation of the existing transportation system.

This input will be used to identify, plan and prioritize projects to meet the transportation needs of the area. Initial efforts will focus on the development of the Public Participation Plan, Long Range Transportation Plan, and corridor studies to improve safety and efficiency within the existing transportation system.

#### **Grand Island Area Metropolitan Planning Organization (GIAMPO)**
