Council Session

Item C1

Update on Community Youth Council Asset Development Program

For the last two years, the Community Youth Council has been involved in encouraging the development of assets in youth in Grand Island. Forty developmental assets have been identified that positively impact young lives. In 2001, the CYC contracted with Community Plus to facilitate asset building classes and programs for youth throughout the community. Judy Sandstrom with Community Plus will be present to update the Council on this year's activities. In addition, individuals who have been identified by the CYC will be recognized for their role in developing assets in our youth.
