Council Session

Item G6

Approving Request of NECO PCS, Inc. dba Nebraska Wireless Telephone Company for a Conditional Use Permit

This item relates to the aforementioned Public Hearing. Tom Schultz representing NECO PCS, Inc. dba Nebraska Wireless Telephone Company, 1512 South Locust Street, has submitted a request with the City Clerk's Office for a Conditional Use Permit to allow for construction of a 330' telecommunications transmission tower to be located at 4940 Gold Core Drive. This request has been reviewed by the Building, Legal, Utilities, Regional Planning, and Public Works Departments. The proposal currently has two exceptions which can be corrected at the time of construction, 1) the engineering plans need to be stamped by a licensed engineer, and 2) the tower proposed location needs to be moved north 14', to comply with required setbacks. Approval is recommended.
