Tuesday, January 15, 2002  
Special Meeting/Study Session

## Item C2

### Discussion of Possible Improvements to L.E. Ray Lake

*In 1994 Council authorized Olsson Associates to develop a plan for the enhancement of L.E. Ray Lake. The enhancements mentioned included camping facilities, asphalt roadways, infrastructure to serve the campgrounds, area lighting, a boat dock and boat ramp, hiking trail and a bridge connection to the small Island located in the west end of the lake. In 1994 the total project cost was estimated to be \$815,000.00. Since the release of the plan we have seen the development of Eagle Scout Lake and its obvious success. We have also began the process to develop a major target shooting facility and campground at the old Cornhusker Army Ammunition Plant site. While the entire plan for the development of L.E. Ray may not apply at this time, a development similar to that found at Eagle Scout Park may be a good place to start discussions.*
