Study Session

Item -1

Presentation of Parks & Recreation Projects

This presentation is being provided to update all Council Members regarding the projects currently being developed by the Park and Recreation Department. The presentation will be made in an attempt to inform, solicit comments, suggestions and questions from Council Members. It is important to remember that the actual construction of a project may be the least expensive component of the overall development. Several of the projects currently underway will result in the need for more employees and funding, to operate the developments at a proper level. For this reason I want to be certain all Council is fully informed and comfortable with the projects as they proceed.
