Study Session

Item -3

Update Concerning the Wastewater Treatment Plant Headworks Project

Staff Contact: John Collins, Public Works Director

Council Agenda Memo

From: Terry Brown, Manager of Engineering Services

Meeting: January 31, 2012

Subject: Update Concerning the Wastewater Treatment Plant Headworks Project

Item #'s: 3

Presenter(s): John Collins, Public Works Director

Background

At the October 11, 2011 meeting, City Council approved hiring Black & Veatch of Kansas City, Missouri to provide engineering services for the Wastewater Treatment Plant and Collection System Rehabilitation.

Discussion

After an in-depth review of the project it has been decided that the most cost effective way to address the headworks for the Plant is through a complete rebuild. In an effort to keep the public and City Council informed on the status of this project Black & Veatch will give a presentation explaining this piece of the project.

Conclusion

This item is presented to the City Council in a Study Session to allow for any questions to be answered and to create a greater understanding of the issue at hand.

It is the intent of City Administration to bring this issue to a future council meeting for the approval of a bid award for the headworks rebuild portion of this project.
